## DETAILED ACTION

## Terminal Disclaimer

1. The terminal disclaimer filed on 02/03/05 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of US patent application 10/777,609 has been reviewed and is accepted. The terminal disclaimer has been recorded.

## Allowable Subject Matter

- 2. Claims 1-86 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: the prior art searched and cited and subsequently discussed with applicant, failed to teach or fairly suggest an ion detector and method for use in a mass spectrometer, said ion detector having one or more microchannel plates, wherein in use ions are received at an input surface of said one or more microchannel plates an output plates, said output surface having a first area; and electrons are released from surface of said one or more microchannel an anode having a surface upon which electrons are received in use, said surface having a second area, wherein said second area is substantially greater than said first area in combination with the remaining

Application/Control Number: 10/777,574

Art Unit: 2881

elements of all the independent claims herein. Accordingly, all remaining dependant claims are allowable because of their dependencies upon claims 1, 4, 49, 52, 55, 58, 68, 71, 74, 77, 80 and 83. US patent application 10/777,609 was discussed in regards to having a possible double patenting issue, the said anticipated issue would be overcome by way of the filed terminal disclaimer discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US patents attached contain art similar to that being claimed by applicant, more specifically, electron detector and microchannel methods and apparatuses.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Johnnie L Smith II whose telephone number is
